Why Waterpik

Brushing Your Teeth Is Not Enough

Even though most of us brush our teeth, many of us have experienced some form of gum disease, which is a root cause of bad breath and tooth loss.

To help prevent gum disease, dental professionals tell us to floss daily. But many of us don't because string floss is difficult and time consuming to use.

Easy to use. Just point the flosser tip between your teeth and along the gumline, and let it do all the work for you.

Fast. Water Flossing takes only a minute a day, making it easy to improve your oral health and enjoy the cleanest, freshest mouth possible.

Effective. The Waterpik Water Flosser removes the plaque and debris lurking deep between teeth and below the gumline, where it's hard to reach with traditional brushing and flossing.

Professional Series

Available exclusively at amazon.com.au
and Dental Practices.

Ultra Professional

Advanced features
and performance.
